

VPN-5Q

Secured connections for home or branch office's Virtual Private Network

VPN-5Q

VPN-5Q Overview

The Network Box VPN-5Q hardware appliance is a fanless Virtual Private Network (VPN) device for customers looking to secure connections between two Internet end points.

It is light weight and has a slim style design to fit any space-limited environment, making it an ideal, cost efficient solution for a home or small branch office.

VPN Types	IPSEC, PPTP, SSL
IPSEC Encryption	DES, 3DES, AES128, AES256
Firewall	Proxy, Packet Filtering, Stateful Packet Inspection
Intrusion Prevention	Zero Latency, Front-line IDP
